

PRESIDENT GERALD FORD GREETING PEOPLE AT YELLOWSTONE AIRPORT, AUGUST 29.

September, 1976

Vol. 27-No. 9

NEW ADDRESS

PLEASE NOTE EFFECTIVE OCTOBER 1, 1976 OUR BOX NUMBER WILL BE CHANGED TO P. O. BOX 5178.

AVIATION LITIGATION

"The General Practioner in Aviation Litigation" will be the subject of a weekend aviation law seminar set for October 1, 2 and 3, 1976 at the Polynesian Hotel, Ocean Shores, Washington.

This working seminar is open to attorneys and other persons interested in aviation law. Sponsored jointly by the Aviation and Space Law Section of the Seattle-King County Bar Association and the Northwest Region of the Federal Aviation Administration, this is the fourth annual aviation law seminar so sponsored.

Among the invited speakers are Roy McPherson, Boeing Test Pilot of the YC-14, and Bert Goodwin, Chief Counsel, Federal Aviation Administration Headquarters in Washington.

Seminar plans are being coordinated for the bar association by Robert Berst, Seattle attorney and chairman of the Aviation and Space Law Section. Inquiries concerning the event may be directed to him at 1518 IBM Bidg., Seattle, WA 98101; telephone (206) 624-4220.

FIRST FEMALE AIRLINE CAPTAIN

Emily Howell, flying for Frontier Airlines, has become the nation's first woman airline pilot. After three years and five months as First Officer, she received her four stripes and is now flying de Havilland Twin Otters out of Denver.

NEW DEADLINE DATE

Due to a new printing schedule, the deadline date for submission of items to this publication is now the 5th of the month in which the material is to be published.

Ted and Connie (Jensen) Mathis cutting their wedding cake, August 14, Great Falls.

YELLOWSTONE AIR SERVICE NEW FACILITIES

By: MIKE FERGUSON

This friendly fixed base operation at Big Timber, with a branch at Livingston, is run by Bill Ferguson, President; and his sons, Russell, Vice President; and Justin, Secretary-Treasurer.

Service provided include 80/87 and 100/130 fuel, crop spraying, air taxi, primary flight school, predatory control, game survey, maintenance and rental aircraft at the Big Timber operation. There is transportation available to town.

Bill Ferguson received his private pilot's license in 1946 in Hysham from Hoyt DeMeres who is now in Missoula. Bill's ratings include commercial, MEL,

Administrator's Column

I attended the Big Sky Airport Fly-in and Buffalo Barbeque at Ennis, Montana, on July 25. The Montana Flying Farmers flew in for the occasion and enjoyed the hospitality of the Mallases and the Kaufmans.

Everyone enjoyed the beautiful weather, skydiving events, glider flying, helicopter rides, spot landing contests, flour bombings, not to mention the delicious buffalo barbeque, the rock band and new aircraft display.

I was a guest at the Cut Bank Chamber of Commerce noon luncheon meeting on August 24 where I spoke on the Aerospace Corporation's commuter airline feasibility study which was completed in March for the Old West Region Commission. The consensus of the Cut Bank Chamber of Commerce appears to be in disagreement with the consultant in choosing Shelby over Cut Bank as a more logical service point in their area of the state. Although they did not disagree with serving Shelby, they felt Cut Bank should be included on a two-stop commuter system.

I then traveled to Shelby and met with their Chamber of Commerce regarding the same subject matter and satisfied some concern over Cut Bank's opposition to the Shelby service selection.

I then explained the Old West Region's progress regarding funding possibilities to subsidize such a network to both communities and suggested that if they have any recommendations regarding the feasibility study, that they should express their views to the Montana Aeronautics Board.

Dave Kneedler and I attended the International Northwest Aviation Council meetings held in Edmonton August 26 and 27. Many of the problems facing the aviation industry are common between both countries and I'm sure we all benefited from a valuable exchange of information.

Representatives from the Northwest Territories, British Columbia, Alberta, Manitoba, Washington, Oregon, Idaho, Utah, Colorado and Montana, in addition to many airport consulting and engineering firms were present. The main theme of the convention was aviation education and the U.S. FAA from Denver, Colorado and Washington, D.C., along with the Canadian Department of Transportation, Pacific Western Airlines and Canada Air presented excellent programs.

Mary Jo (Janey) Oliver presented one of the FAA programs. Many of you probably remember Mary Jo as she formerly was the Aviation Education Supervisor for the Aeronautics Commission and is now assistant to Dr. Mervin Strickler, Chief, Aviation Education Programs Division, Office of General Aviation in Washington, D.C.

A meeting was held between the Aeronautics Board and West Yellowstone area citizens at Yellowstone Airport September 8 regarding a proposed year round operation feasibility study. The consensus was that the West Yellowstone people feel winter operation of this airport is desirable and that local funding could be provided for the sponsor's share if such a study is eligible under the new ADAP bill recently passed and signed into law by President Ford.

The Aeronautics Board requested that the Aeronautics Division meet with the FAA regarding this matter and report to the Board at their upcoming meeting on September 24.

Marine VH-3 Sikorski helicopter used to transport the presidential party during their visit to Yellowstone Airport and the Park, August 29.

Part of the waiting crowd at Yellowstone Airport August 29 anticipating the arrival of President Ford.

By: TED MATHIS, Airport Manager

Did you ever wonder what it takes to get a president on the ground and off again? Well, here is some idea of what went on at the Yellowstone Airport before, during and after his visit of lugust 29, 1976.

Tuesday, August 24

On this date I received a call from the Pentagon advising that the President was to visit here on Sunday and that an Air Force DC-9 would arrive today with an advance party. This aircraft landed at 1230. The afternoon was taken up with a meeting with the Air Force regarding airport procedures required for the visit.

Wednesday, August 25

This date I met with White House Communications personnel regarding their setting up radios and telephone communications on the field. Their crews set up in the fire station. At about 1430 a Lockheed C-141 landed with secret service and support equipment. The Marines then posted guards around their equipment.

Thursday, August 26

Lockheed C-141 departed at about 0930. At 1300 a meeting of local law enforcement people was held in the fire station to set up security for the visit. The telephone company flew in three plane loads of microwave gear and began setting up for extra phone service to the airport.

Friday, August 27

All required airport personnel met at 0900 regarding respective duties and tentative schedule. The telephone

company put in an island of extra pay phones in the terminal lobby and buried 40 extra pairs of cables to increase phone service. That afternoon CFR and ambulance crews were established for the Sunday visit. At 1730 three large VH-3 Marine helicopters arrived from Virginia and set up their operations base at the Interagency Jump Center.

Saturday, August 28

At 1030 an Air Force C-141 landed with more support equipment and the Air Force set up their operations. At 1300 a Convair landed with extra Park and Forest Service personnel. A meeting of some 50 Secret Service personnel was held at the fire station. Telephone company crews worked on Communications equipment. The FAA set up their temporary tower on top of the airport fire station. Air Force came up from Colorado and made a low pass over the field. Marine helicopters made a practice run into the Park.

Sunday, August 29

At 0900 another C-141 landed with more support equipment. At this time the tower began operations. At 1030 a Braniff DC-8 landed with press people. At 1230 Air Force I landed with President Ford and he departed on Marine 1. The President returned at 1530 on Marine 1 and departed on Air Force I. At 1730 the Braniff DC-8 took off. At 1830 a C-141 landed and loaded, then took off.

Monday, August 30

Two C-141 transports landed, loaded support equipment and took off for Washington, D.C. The Marine helicopters departed to return to Virginia.

instrument and CFII. He was raised on a ranch at Hysham where he lived until he founded Yellowstone Air Service. Bill is active in the Lions, Montana Aviation Trades Association, Toastmasters, National Aerial Applicators Association, and Aircraft Owners and Pilots Association. His favorite hobby is hunting. Bill and Erma have two daughters and four sons.

Russell's ratings include commercial, SEL, MEL and rotorcraft. He manages the Livingston branch where he engages in air taxi operations, air ag, aircraft storage and sells 80/87 and 100/130 fuel. Russell resides in Livingston with his wife Joan.

Justin has his commercial rating as well as SEL and rotorcraft and is an A&P mechanic. He lives in Big Timber and is unmarried.

Allen Rickman, A&P mechanic also works at the Big Timber facility.

The grand opening of the new facility at Big Timber was held in conjunction with the celebration of Bill and Erma's 28th wedding anniversary. Dean Noble, Sales Manager for Cessna Ag Aircraft from Wichita and his wife came in for the grand opening, as well as Mel Sellens, Area Ag Aircraft Representative.

Bill Ferguson, wife Erma and family, being congratulated by Mel Sellers, Cessna Ag Aircraft representative on the grand opening of the new facility at Yellowstone Air Service.

OF BIRDS AND HELICOPTERS

By: DAVID C. KNEEDLER, Chief Airport/Airways Bureau

I know the problems of birds nesting in hangers is all too familiar to many of you. And for those who have not had this delightful experience first hand it doesn't take much imagination to understand the problems caused. In our travels around the state we have not only seen the problem many, many places but have observed every conceivable solution ranging from poisoning to shooting to scarecrows.

A relatively new and reportedly effective scheme uses an electrically operated transmitter which emits scientifically designed sounds to jam and disrupt the birds hearing processes while simultaneously presenting to the bird elements of natural alarm signals. It seems to be a clean harmless way to get rid of your bird problems. Here is the address:

Av-Alarm Corporation 960 North San Antonio Road Suite 170

Los Altos, CA 94022
On a different subject many of you may know that in about 1966 we initiated a new program at the Aeronautics Commission designed to promote aviation through its value to

the emergency medical services field. Since then the main thrust of this program has been the encouragement of hospital heliport construction to enhance the transportation-by-air of medical emergencies, supplies, and personnel. To date we have been involved in varying degrees in the planning and/or construction of 19 heliports in Montana and we were therefore very interested in the following newspaper article which was taken from the Weekly News in Kalispell.

"JET COPTER RESCUE. There's no doubt in the mind of doctors that Guy D. Sears, 25, of Havre, is still alive because of the first nighttime evacuation by jet helicopter from an accident scene. Sears was critically injured when he lost control of his motorcycle at the Java underpass of the Burlington Northern at 12:30 a.m. Saturday.

The machine went more than 150 feet out of control and rolling, throwing Sears from it into adjacent rock walls when he incurred a skull fracture and a sub-dural hematoma. Glacier Park Rangers and the Montana Highway Patrol blocked U.S. 2 and lit fusees to

give the helicopter a landing site. He reached the Kalispell Regional Hospital 21 minutes after the evacuation flight started where his condition was stabilized and he was then flown on to St. Patrick Hospital at Missoula for specialized treatment.

Attending physicians noted if Sears had been brought to the hospital by conventional means, he very likely would have died before he could have received adequate medical treatment."

One more example of aviation's value in every part of our lives. It's much, much more than a mere "rich man's toy."

AVIATION EDUCATION

By' SAM GRIGGS, Supervisor Garth Hull, NASA Educational Programs Chief, provided a conference telephone call including the two curriculum directors in Billings, and me, to discuss an accredited workshop to be held by Eastern Montana College. Teachers will meet in the evening for classes three or four times weekly for two weeks. During the day NASA's instructor, Bill Horvath, will work in the classrooms with the teachers concerned. The workshop is in conjunction with NASA's Spacemobile tour through the southern half of Montana, from September 23 to November 12. The NASA lecturer will spend one day at Crow Agency, Hardin.

On August 20, I combined a chartered trip to Whitefish with an appointment with the Superintendent of Whitefish schools, Mr. Rus Giesy. I provided him with copies of the teachers handbook and he gave me names of teachers already working on some aspects of aerospace education.

August 30 and 31, I flew four of a party of 50 people from the Office of the Superindentent of Public Instruction to Glendive and Wolf Point, and September 2 and 3 we went to Lewistown and Havre. These state sponsored workshops were held in the respective high schools with 400 to 600 teachers attendees.

I had the opportunity to set up a booth and show our aviation materials and discuss our program. I talked to many interested teachers, handed out teacher handbooks to different schools in the areas, and passed out free literature.

FEDERAL AVIATION ADMINISTRATION ITNERARY LISTINGS

One or more inspectors will be at the following airports on the date specified for the purpose of written examinations, flight tests and aircraft inspections. APPOINTMENTS FOR THESE SERVICES MUST BE REQUESTED A WEEK IN ADVANCE TO ALLOW FOR SCHEDULING OF INSPECTORS.

WRITTEN TESTS: APPLICANTS FOR WRITTEN TESTS MUST MAKE AN APPOINTMENT AS INDICATED ABOVE. Examinations will begin at 8:00 a.m.; no applicants will be accepted after 9:00 a.m. Applicants must present written evidence of satisfactory completion of ground or home study course required by FAR Part 61 for the certificate or rating sought signed by a flight or ground instructor or graduation certificate from an approved course.

FLIGHT TESTS: Properly certificated aircraft with aircraft log books and required documents must be presented for all aircraft used for flight tests

Airport managers and operators are encouraged to advise the General Aviation District Office of anticipated work load prior to itinerary dates to assure adequate inspector personnel coverage. Scheduling of visits other than those listed will be made commensurate with work load and availability.

GAME SCOUTING

By: DALE UPPINGHOUSE Accident Prevention Specialist, RM GADO 1

Some years we get by without a fatal game scouting accident in Montana. The following factors are involved in these accidents:

- A strong desire by a small group of hunters to get the jump on the other hunters by knowing the whereabouts of deer or elk.
- 2. One person in this group who is a hunter first and a pilot second. (In most cases he will be marginally current in the airplane.)

3. An airplane (usually four-place) with 125 to 250 horsepower. Usually, the airplane is a good airplane for normal use, but totally unsuited for quick turns and fast climbs at altitude.

Now we place three or four hunters in the airplane and head for the high country. (Chances are about 50-50 at this point that there will be a fatal accident.)

At first the pilot stays a bit high, but his companions want a closer look and he decides to drop down for a better look. (Odds on the accident are now 60-40.)

One of the hunters sees something in the timber and the pilot is persuaded to turn up a draw. (Odds on the accident are now 80-20.)

Like we said, sometimes we beat the odds. Not often.
